Proximity Stem Weave

[THE MECHANICS:]

Heavyweight 500gsm streetwear hoodies woven with passive UHF-NFC conductive silver thread and reversible thermochromic pigment ink. Each garment holds an encrypted cryptographic stem of an unreleased underground music track; when three garments physically enter a 2-meter radius at a venue, the full master track unlocks on the wearers phones alongside zero-fee secondary resale royalties.

[UTILITARIAN VALUE:]

Turns physical apparel drops into collaborative multiplayer audio keys, driving organic real-world meetups and eliminating counterfeit street resale.

[TARGET ECOSYSTEM:]

Independent streetwear labels, underground electronic record labels, and phygital fashion collectives.
