Subcultural Vault Tickets

[THE MECHANICS:]

Brain Dead releases a physical, NFC-embedded acrylic membership token shaped like an experimental film sprocket. Owning the token grants physical priority access to the Los Angeles theater and secret hardware drops, but the token's metadata automatically decays in valuation after 72 hours of inactivity. To prevent decay and maintain tier-one access status, holders must physically tap their token at designated subterranean installation points across Los Angeles or trade access rights peer-to-peer on a decentralized secondary ledger integrated into the brand app.

[UTILITARIAN VALUE:]

This architecture unlocks immediate upfront capital via primary hardware sales while establishing a perpetual monetization loop through secondary market royalty splits on access rights. It permanently shifts customer behavior from passive retail consumption to active subcultural curation, dramatically amplifying organic foot traffic to physical retail spaces and independent screenings without increasing traditional advertising overhead.

[TARGET ECOSYSTEM:]

Boutique physical-digital hybrid retail targeting high-intent collectors and subculture enthusiasts within the Los Angeles and global creative diaspora.
