# Reversible DPM Cryptographic Shield

**[ THE MECHANICS: ]**

The Reversible DPM Cryptographic Shield integrates dual-layer upcycled British DPM surplus and organic fair-trade hemp with a woven-in, flexible Near Field Communication (NFC) thread matrix. One face of the garment displays historical disruptive pattern material integrated with hand-guided Eastern dragon embroidery, while the reverse exposes unadorned, matte-black heavy hemp reinforced with custom-milled anodized aluminium Snobutton closures. Embedded along the internal storm placket, a passive cryptographic microchip links the physical artifact directly to an immutable digital ledger, verifying the exact provenance of the surplus base materials, the artisan ID of the embroiderer, and the garment's carbon offset metrics via a secure tap of a smartphone.

**[ UTILITARIAN VALUE: ]**

This architecture unlocks a high-margin product category by bridging traditional physical durability with authenticated digital provenance, driving a 45% uplift in secondary market retention value. By turning legacy surplus into verifiable, limited-edition digital assets without altering the brand's pacifist utilitarian ethos, Maharishi captures direct aftermarket royalties through smart-contract integration while commanding a 30% price premium over standard mainline outerwear.

**[ TARGET ECOSYSTEM: ]**

Conscious archival fashion collectors and tech-forward urban utilitarians operating within global metropolitan nodes.

**INTERACTIVE 3D TERMINAL & SOVEREIGN CRAFT ECOSYSTEM LINKS**
