Galvanic Skin-Conductance FM Matrix

[THE MECHANICS:]

An unbuffered organismic polyphonic synthesizer where exposed acid-etched brass touchplates route the performer's real-time galvanic skin resistance and micro-perspiration capacitance directly into the feedback loops of four cross-coupled analog relaxation oscillators. The human nervous system acts as the physical patch cable and variable resistor, translating finger pressure, pulse micro-tremors, and skin conductivity into living harmonic timbres.

[UTILITARIAN VALUE:]

Creates an intimate, zero-menu electro-acoustic instrument with a 100% mechanical bill of materials and unrepeatable organic expressivity.

[TARGET ECOSYSTEM:]

Experimental sound designers, avant-garde live performers, and organismic hardware builders.
