Milled Aluminum Tape Flutter Transport

[THE MECHANICS:]

A pocket-sized CNC-machined anodized aluminum endless-loop magnetic tape deck integrated with an optical capstan phase-detector and an exposed thumb-wheel pinch roller. Performers physically scrub, brake, or rock the machined brass flywheel with their thumb while a dual-gap amorphous cobalt read/write head performs real-time analog varispeed pitch-shifting and tape-saturation looping with zero digital conversion.

[UTILITARIAN VALUE:]

Brings authentic physical magnetic tape saturation and tactile flywheel scrubbing into a pocket field-system module with replaceable surgical-grade endless loop cartridges.

[TARGET ECOSYSTEM:]

Portable field-recording musicians, industrial product designers, and tactile hardware collectors.
