The Galvanic Bio-Feedback Acoustic Crypt

[THE MECHANICS:]

An organismic analog electro-acoustic instrument coupling a continuous non-linear chaotic attractor core (Chua circuit phase-space topology) directly with an internal acoustic phosphor-bronze spring tank and solid brass skin-conductance contact nodes.

Rather than standard static CV/Gate, the performer's galvanic epidermal resistance dynamically modulates the strange attractor's bifurcation points and state transitions. Physical touch on the exposed resonant spring tines injects microphonic mechanical harmonics directly into the feedback loop through a subminiature vacuum tube preamp, transforming physical finger pressure and body conductivity into non-repeatable acoustic resonance.

[UTILITARIAN VALUE:]

Brings visceral biological feedback and tactile chaotic physics into acoustic electronic composition, live performance, and avant-garde sound design.

[TARGET ECOSYSTEM:]

Avant-garde sound sculptors, boutique hardware musicians, experimental acoustic researchers, film composers.

Roily USD Craft Bounties:
Commission or challenge independent sound designers for verified USD bounties at https://roily-app.vercel.app
