Phase-Change UHMWPE Bouldering Vest & Quick-Dump Chalk Chassis

[THE MECHANICS:]

An ultralight 145-gram hybrid vest combining ultra-high-molecular-weight polyethylene gridstop panels across abrasion zones with laser-perforated ceramic phase-change back ventilation to dump heat during steep approaches. The lower lumbar spine houses a collapsible magnetic-seal chalk and wind-shell compartment engineered to cinch flush against the center of gravity via one-handed shock-cord tensioners, preventing pendulum bounce during dynamic climbing moves.

[UTILITARIAN VALUE:]

Merges technical alpine pack utility with everyday urban outerwear, creating a flagship crossover item that sells out across both Seoul climbing gyms and global avant-garde boutiques.

[TARGET ECOSYSTEM:]

Granite boulderers, fastpackers, Korean technical menswear boutiques, and industrial gear collectors.
