Phase-Locked Granular Resonator & Tactile Ribbon Field Recorder

---

[THE MECHANICS:]

A pocketable anodized-aluminum granular field instrument pairing dual low-noise phantom-powered stereo preamps with a capacitive carbon ribbon controller directly coupled to real-time spectral grain freezing. Instead of transferring WAV stems via SD cards after a session, performers scrub live wind, water, or mechanical transients in real time with per-voice resonant bandpass filters and CV clock sync.

[UTILITARIAN VALUE:]

Turns live acoustic field capture directly into polyphonic harmonic textures in a battery-powered portable chassis, unlocking ambient film composers and live experimentalists who want untethered outdoor sampling.

[TARGET ECOSYSTEM:]

Electro-acoustic field recordists, film sound designers, live hardware performers, and modular synth studios.
