Aerogel-Baffled Storm Collar & Magnetic Rescue Shell

[THE MECHANICS:]

An ultralight 3-layer storm shell integrating hydrophobic silica-aerogel micro-baffles along the collar, kidney, and wrist cuffs where convective wind chill hits hardest, paired with glove-operable Fidlock storm-hood locks and an integrated passive radar reflector woven directly into the seam tape.

[UTILITARIAN VALUE:]

Creates a signature high-ticket winter capsule bridging Reykjavik maritime rescue heritage with urban storm wear, featuring zero-bulk aerogel thermal baffles around the neck and core.

[TARGET ECOSYSTEM:]

Arctic expedition crews, technical outerwear collectors, winter commuters, and industrial design buyers.
