Phase-Change Merino Travel Overshirt & RFID Passport Spine

[THE MECHANICS:]

A double-weave nylon-merino overshirt featuring a laminated Dyneema-mesh internal yoke that distributes the weight of a passport, AirPods, and titanium power bank across the shoulders instead of sagging the chest pockets, finished with fluorocarbon-free storm DWR.

[UTILITARIAN VALUE:]

Adds a high-margin outer layer bridging mountain trail durability and long-haul flights, replacing bulky carry-on organizers with an invisible weight-balanced spine pocket architecture.

[TARGET ECOSYSTEM:]

One-bag international travelers, remote hardware founders, expedition photographers, and technical commuters.
