NodeX Micro-Ratchet Compass Module & Titanium Link Dock

[THE MECHANICS:]

A 3.2mm-thin Grade 5 titanium utility link that slides directly into the Nodus NodeX bracelet rail via captive spring-bars, housing either a liquid-damped sapphire micro-compass or an NFC emergency medical/ICE titanium slug. Locked flush beneath the wrist profile with zero sharp edges, the module preserves the full 10mm tool-free micro-adjustment travel of the NodeX clasp. Crash-Test Unit Economics: Standard 20mm/16mm taper compatibility across Nodus lines, zero warranty impact on watch heads, and high repeat purchase velocity.

[UTILITARIAN VALUE:]

Crash-Test Spec: Monetizes the proprietary NodeX clasp ecosystem as a standalone modular field-instrument platform, letting owners dock utility capsules onto existing bracelets.

[TARGET ECOSYSTEM:]

Tool-watch enthusiasts, backcountry field engineers, EDC hardware collectors, and microbrand watchmakers.
