Mag-Lock Aluminum Rail Spine & Zero-Zipper Quick-Draw Tech Folio

---

[THE MECHANICS:]

A featherweight 68-gram stamped aluminum and recycled-ripstop internal organizer spine equipped with two-stage magnetic Fidlock-style shear latches and tensioned Hypalon elastic loops. Users dock the folio directly onto existing internal pack loops or snap it out in one motion as a self-standing desk caddy at airport gates or studio benches. Crash-Test Unit Economics: Flat-packable textile + stamped alloy construction with zero complex stitching curves and seamless cross-compatibility across Transit and Venture lines.

[UTILITARIAN VALUE:]

Crash-Test Spec: Eliminates zipper abrasion and tangled cable clutter inside Venture backpacks by introducing a snap-in anodized aluminum spine rail for SSDs, power banks, and field audio recorders.

[TARGET ECOSYSTEM:]

Field documentary crews, traveling hardware engineers, remote product builders, and technical carry enthusiasts.
